Paper

Name

3 July 2020

Abstract

Contents

Abstract **i**

1 Introducion **1**

2 Related Work **2**
2.1 Overview . . . 2
2.2 Review of the state-of-the-art . . . 2
2.3 Analysis . . . 2

3 Proposed Method **3**
3.1 Overview . . . 3
3.2 Problem formulation . . . 3
3.3 Method . . . 3
3.4 Proposed CNN model . . . 3
3.5 Dataset and Data Augmentation . . . 3
3.6 Training the CNN model . . . 3

4 Evaluation Protocol **4**
4.1 Implementation details . . . 4
4.2 Evaluation method and metrics . . . 4
4.2.1 Accuracy . . . 4
4.2.2 Specificity . . . 4
4.2.3 Sensitivity . . . 4
4.2.4 Precision . . . 4

5 Model Selections **5**
5.1 CNN architectures . . . 5
5.2 Activation functions . . . 5
5.3 Optimizers . . . 5

6 Results **6**

7 Comparison and Discussion **7**

8 Analysis of Features **8**
8.1 Box Plots . . . 8
8.2 ROC Curve . . . 8
8.3 Confusion Matrix . . . 8

9 Conclusion **8**

1 Introducion

2 Related Work

2.1 Overview

2.2 Review of the state-of-the-art

2.3 Analysis

3 Proposed Method

3.1 Overview

3.2 Problem formulation

3.3 Method

3.4 Proposed CNN model

3.5 Dataset and Data Augmentation

3.6 Training the CNN model

4 Evaluation Protocol

4.1 Implementation details

4.2 Evaluation method and metrics

4.2.1 Accuracy

4.2.2 Specificity

4.2.3 Sensitivity

4.2.4 Precision

5 Model Selections

5.1 CNN architectures

5.2 Activation functions

5.3 Optimizers

6 Results

7 Comparison and Discussion

8 Analysis of Features

8.1 Box Plots

8.2 ROC Curve

8.3 Confusion Matrix

9 Conclusion
